Leaving Certificate Examination, 2022

Design and Communication Graphics

Student Assignment

Ordinary Level and Higher Level

160 marks

Details of the Student Assignment for the Leaving Certificate Examination, 2022 are given overleaf.

The Student Assignment must be completed by Friday 14 January, 2022.

The work should be submitted following the issue of candidate examination numbers to schools.

Design and Communication Graphics (DCG) Student Assignment Leaving Certificate 2022

Instructions to candidates:

1. Your coursework submitted for assessment must consist of two components:
 - A bound A3 design portfolio
 - The portfolio should contain a maximum of **8 pages** at Ordinary Level and a maximum of **10 pages** at Higher Level.
 - An individual **USB flash drive** containing:
 - All of the SolidWorks files relating to the completed assignment
 - An electronic copy of the completed portfolio in **PDF format**

All coursework submitted for assessment must be clearly identified with your examination number which will be issued to your school early in 2022. It is your responsibility to ensure that all electronic materials submitted are free from viruses, so that examiners can open all required files for assessment. **Please note that the portfolio and USB flash drive will not be returned at the end of the assessment process.**

2. The **USB flash drive** must contain one main folder. The name of this folder should contain your candidate examination number in the following format “DCG SA 2022(Exam number)”.
3. The main folder, referred to above, must contain two sub-folders. One of these sub-folders will contain all the pages from the completed assignment in **PDF format**. The other sub-folder must contain two sub-folders. One of these sub-folders must contain all of the SolidWorks electronic files associated with Part A of the assignment and the second subfolder must contain all of the SolidWorks electronic files associated with Part B of the assignment. No other files should be included on the **USB flash drive**.
(All required CAD files must be in SolidWorks format. The version of SolidWorks used to complete your assignment should be indicated on the front cover of your design portfolio.)
4. It is your responsibility to ensure that all of the required files are contained on the **USB flash drive** prior to submission of the work. You will **lose marks** under the relevant headings in the marking scheme if required files are omitted. Marks will be awarded for conforming to the filing structure outlined above.
A backup copy of the **submitted files** should be retained in your school until the assessment process is complete.
5. For protection during transit, the **USB flash drive** must be placed in a protective sleeve or envelope. This should be fixed **close to the bound edge** on the inside cover of the design portfolio.
6. You must submit your **original sketches** for Outputs 2 and 6 – scanned images will not suffice.
7. The coursework submitted for assessment must be **your own individual work** and must be **completed in school** under the supervision of the class teacher.
8. When using research sources, including the Internet, the sources must be acknowledged. Research material copied directly from the Internet or from other sources and presented as your own work will not receive marks.
9. The coursework presented for assessment must be displayed in an attractive manner and marks will be awarded for presentation.
10. The coursework must be completed by **Friday 14 January 2022**.

Ordinary Level Student Assignment - Leaving Certificate 2022

Digital frames were developed to display photographs and videos without the need to be connected to a computer. They are available in a variety of shapes, sizes and materials. Design features may include a power system designed for continuous use, high resolution screen, memory card slot, integrated speakers, WiFi connection, etc.

(A) Carry out a design investigation of existing digital frames in graphic format. Your investigation should include an analysis of physical forms and shapes, features, materials etc.

and

(B) Show graphically how you would physically modify a chosen digital frame to improve its overall design.

or

Develop and graphically communicate a new concept design for a digital frame based on a selected theme or target market.

The assignment should follow the structure outlined in the marking considerations below.

Student Assignment - Ordinary Level

	No.	Section Heading	Description	Suggested no. of A3 Pages	Marks	
Presentation, thought process, reflection and factor of difficulty will be considered throughout.	Part (A) - Existing Artefacts	1	Design Research & Design Feature Comparison	Exploration of brief and presentation of existing artefacts in graphic format. Select 2 images and illustrate/explain the main design features. Insert the main dimensions. Compare and contrast the main design features of both using suitable freehand sketches and other presentation techniques.	1-2	50
		2	Freehand Graphical Representation	Choose one of the artefacts and make a detailed graphical presentation of this artefact. This should include a rendered freehand presentation quality drawing in 3D format.	1	
		3	SolidWorks Parts, Assembly, Drawing and eDrawing files	Detailed computer model, comprising at least 3 parts but no more than 6 parts, an Assembly, a Drawing and an eDrawing of the selected artefact. The required filing structure will be considered in the marking process.	Electronic SolidWorks files	60
		4	Hardcopy output from Solidworks	Detailed orthographic views. Exploded View.	1-2	
	Part (B) Design Modification or Concept Design	5	Graphical exploration of design solutions	Analysis of brief and graphical illustration of possible solution(s). Justification for chosen solution(s).	1-2	50
		6	Presentation of Modification/ Concept Design	Detailed graphical presentation of the design Modification/Concept Design. This should include a rendered freehand presentation quality drawing in 3D format.	1	
		7	Hardcopy output from Solidworks	CAD Model (Part/Assembly & Drawing) and associated hardcopies to include appropriately detailed orthographic and rendered pictorial views to communicate your chosen design.	1-2 (Plus electronic SolidWorks files)	
				Total 8	160	

Higher Level Student Assignment - Leaving Certificate 2022

Reusable travel mugs are designed to keep liquids at a preferred temperature for a prolonged period. Their ergonomic design has resulted in a range of sleek, lightweight and customisable products which are insulated, leak proof and compatible with standard cup holders in many vehicles. Some 'smart' products can heat or cool liquids to a required temperature and can track daily consumption with the use of apps.

(A) Carry out a design investigation of existing reusable travel mugs in graphic format. Your investigation should include an analysis of physical forms and shapes, ergonomics, materials, connectivity, etc.

and

(B) Show graphically how you would physically modify a chosen reusable travel mug to improve its overall design.

or

Develop and graphically communicate a new concept design for a reusable travel mug based on a selected theme or target market.

The assignment should follow the structure outlined in the marking considerations below.

Student Assignment - Higher Level

	No.	Section Heading	Description	Suggested no. of A3 Pages	Marks	
Presentation, thought process, reflection and factor of difficulty will be considered throughout.	Part (A) - Existing Artefacts	1	Design Research & Design Feature Comparison	Exploration of brief and presentation of existing artefacts in graphic format using primary and secondary research. Select 2 images and illustrate/explain the main design features. Insert the main dimensions. Compare and contrast the main design features of both using suitable freehand sketches and other presentation techniques.	2-3	50
		2	Freehand Graphical Representation	Choose one of the artefacts and make a detailed graphical presentation of this artefact. This should include a rendered freehand presentation quality drawing in 3D format.	1	
		3	SolidWorks Parts, Assembly, Drawing, and eDrawing files	Generate a computer model comprising at least 5 parts but no more than 10 parts, an Assembly, a Drawing and an eDrawing of the selected artefact. Economy of design, design intent and the required filing structure will be considered in the marking process.	Electronic SolidWorks files	50
		4	Hardcopy output from Solidworks	Detailed orthographic views. Exploded View.	1-2	
	Part (B) Design Modification or Concept Design	5	Graphical exploration of design solutions	Analysis of brief and graphical illustration of possible solutions. Justification for chosen solution(s) including aesthetics, functionality and environmental sustainability.	1-3	60
		6	Presentation of Modification/ Concept Design	Detailed graphical presentation of the design Modification/Concept Design. This should include a rendered freehand presentation quality drawing in 3D format.	1	
		7	Hardcopy output from Solidworks	CAD Model (Part/Assembly & Drawing) and associated hardcopies to include appropriately detailed orthographic, rendered pictorial and photorealistic views to communicate your chosen design.	1-3 (Plus Electronic SolidWorks files)	
				Total 10	160
